EDUCATION

University of Southern California Doctor of Philosophy, Computer Science	2022.6 - present
New York University Master of Science, Computer Science	2021.5
University of Michigan, Ann Arbor Bachelor of Science in Engineering, Electrical Engineering	2019.5

PUBLICATIONS

Mengxi Wu, Mohammad Rostami. “Unsupervised Domain Adaptation for Graph-Structured Data Using Class-Conditional Distribution Alignment.” *submitted*

Mengxi Wu, Yi-Jen Chiang, Christopher Musco. “Streaming Approach to In Situ Selection of Key Time Steps for Time-Varying Volume Data.” *Eurographics/IEEE Conference on Visualization 2022*

Mengxi Wu, Hao Huang, Yi Fang. “3D Point Cloud Completion with Geometric-Aware Adversarial Augmentation.” *International Conference on Pattern Recognition 2022*

RESEARCH EXPERIENCE

Information Science Institute 2022.6 - Present
Research Assistant, Advised by Prof. Mohammad Rostami

- Conducted research on machine learning in data-scarce regimes, including transfer learning, zero-shot/few-shot learning, lifelong learning, multi-task learning, and domain adaptation, especially problems related to graph-structured data.

Multimedia and Visual Computing Lab 2021.3 - 2022.5
Research Assistant, Advised by Prof. Yi Fang

- Conducted research on geometric-aware adversarial training methods for 3D point cloud completion.
- Designed a novel adversarial attack method that constrains adversarial perturbations with absolute minimum curvature direction of original data and published the results on ICPR 2022.

Algorithms and Foundations Group 2020.6 - 2022.4
Research Assistant, Advised by Prof. Yi-Jen Chiang and Prof. Christopher Musco

- Conducted research on in situ selection of key time steps for high dimensional time-varying data.
- Developed a new greedy algorithm with numerical linear algebra techniques to compute linear interpolation solutions and errors in an online streaming fashion and published the results on EuroVis 2022.

WORK EXPERIENCE

Huawei 2021.9 - 2022.5
Algorithm Engineer, Network AI Engine Department

- Developed intelligent systems to detect fire, smoke, and helmet in 2D images captured from cameras on construction sites.
- Investigated and adjusted the state-of-the-art 2D object detection models (e.g., YOLOR, YOLOX).

- Explored various training methods include Active Learning and Knowledge Distillation.

TEACHING EXPERIENCE

CSCI 570: Analysis of Algorithms

2022.8 - Present

Teaching Assistant, University of Southern California

- Created and Graded homework/Exams and held office hours to help students understand concepts.

ECE-GY 9123: Deep Learning

2021.1 - 2021.5

Teaching Assistant, New York University

- Graded homework and held office hours to help students understand concepts.

TECHNICAL SKILLS

Programming Languages

C/C++, Python, Java, R, MATLAB, Swift

Libraries and Tools

PyTorch, Tensorflow, PySpark, Hadoop
